7	OK	CWA 301	TRIANGLE DEVELOPMENT COMPANY, A MINNESOTA CORPORATION	11/28/97	A.O.	

1. AO = Administrative Order requiring compliance with environmental regulations, APO = Administrative Penalty Order requiring compliance with environmental regulations and assessing a penalty, AUDPOL = Audit Policy, C.J = Civil Judicial Case referred to the Department of Justice. 2. P = Proposed

### **Narrative Summary**

**3. IDABEL, CITY OF:** (NPDES Permit No. OK0027677) EPA issued Administrative Order Docket No. 97-0139 on October 22, 1997, requiring the Permittee to submit a comprehensive written plan by November 1, 1997, to meet the effluent limits required by the permit for Zinc, Nickel and Lead within the shortest possible time and to report overflows to the correction system since 1995.

**5. MARMAC RESOURCES COMPANY:** EPA issued Administrative Penalty Order 98-1603 on October 30, 1997, for unauthorized discharge of salt water to a tributary of Birch Creek in Osage County, Oklahoma. The company operates an oil field which includes many pipelines to move oil and salt water from production wells and to injection wells used for enhanced oil recovery. During the past three years, the company has numerous salt water discharges to surface streams that cross the lease. EPA consultations with the company have been unsuccessful in achieving compliance with EPA regulations. The order was proposed because the company continued periodic discharges of salt water.

**8. TRIANGLE DEVELOPMENT:** (NPDES Permit No. OKR10B092) EPA issued Administrative Order Docket No. 98-1008 on November 28, 1997, to the owner of this housing developmental property of approximately 40 acres for violating the Federal storm water regulations, for not fully implementing best management practices and the storm water pollution prevention plan for the site. EPA found the site cleared of all vegetation and without proper structural controls to reduce and or prevent erosion and sediment runoff. The site is fully exposed to storm water thus creating a high potential for increased erosion and sediment runoff.
